Honua Kai Air Conditioning Replacement Project

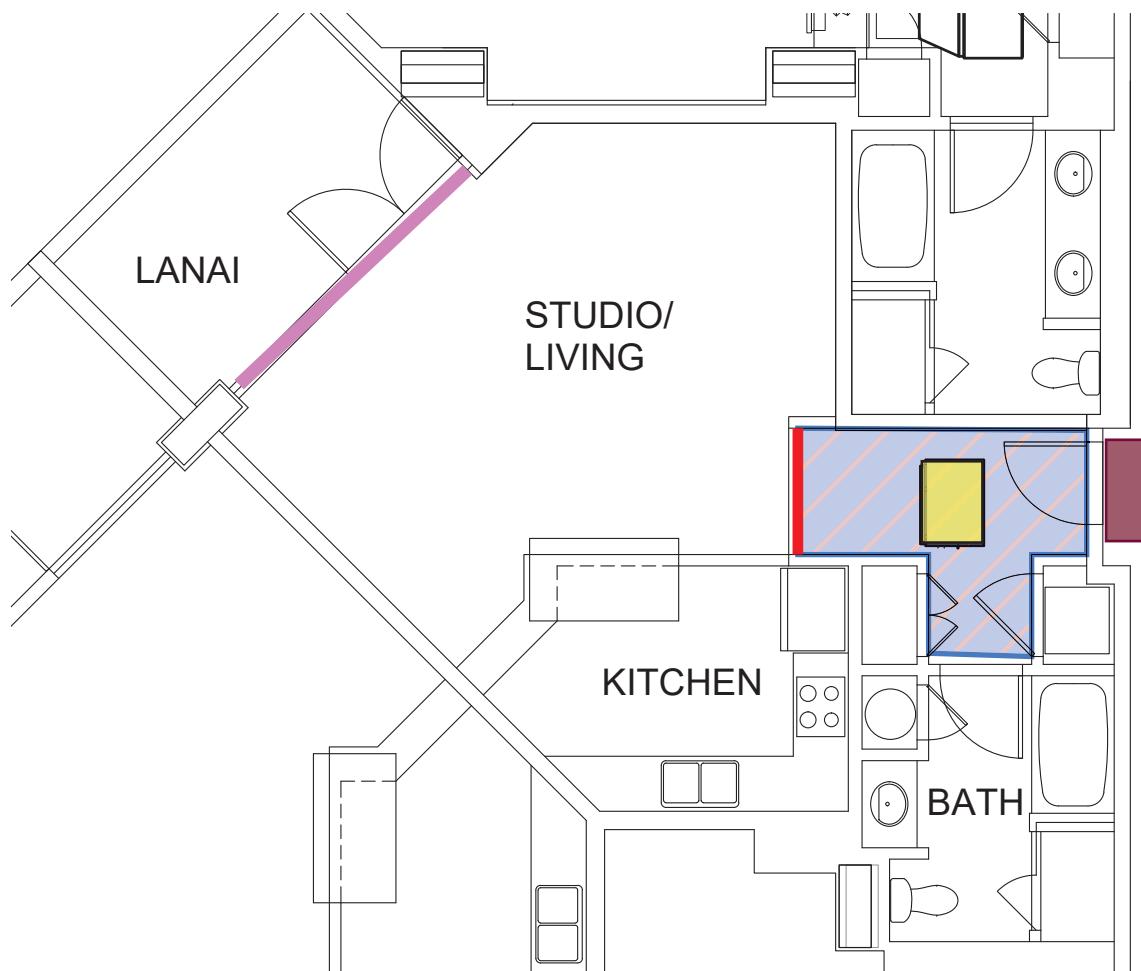

Attachment C

Note: your unit type is provided in the corresponding schedules - Attachment A for Hokulani, Attachment B for Konea.

Floors plans are organized by Wing character (A, B, C, D) then by type character/number.

Logistical Overlays for Each Floor Plan

Note to Residents/Owners: The layout in this diagram represents the original design locations of the Fan Coil Unit in your apartment. We realize that some units may have FCUs located in slightly different positions than what is shown on this drawing. In such cases, the area under and near the actual, existing FCU will be the "Work Area" and the shortest pathway leading to the "Work Area" will be included in the "Path of Travel".

Work Area - OVERHEAD EQUIPMENT WORK
Remove all furnishings and items on exposed counters and surfaces. Floor protection to be provided with plastic sheathing at openings.

Path of Travel
Remove all furnishings and wall art. Floor protection to be provided.

Plastic Sheathing
Floor to ceiling plastic sheathing to be provided. Sheathing will not have through access to mitigate dust.

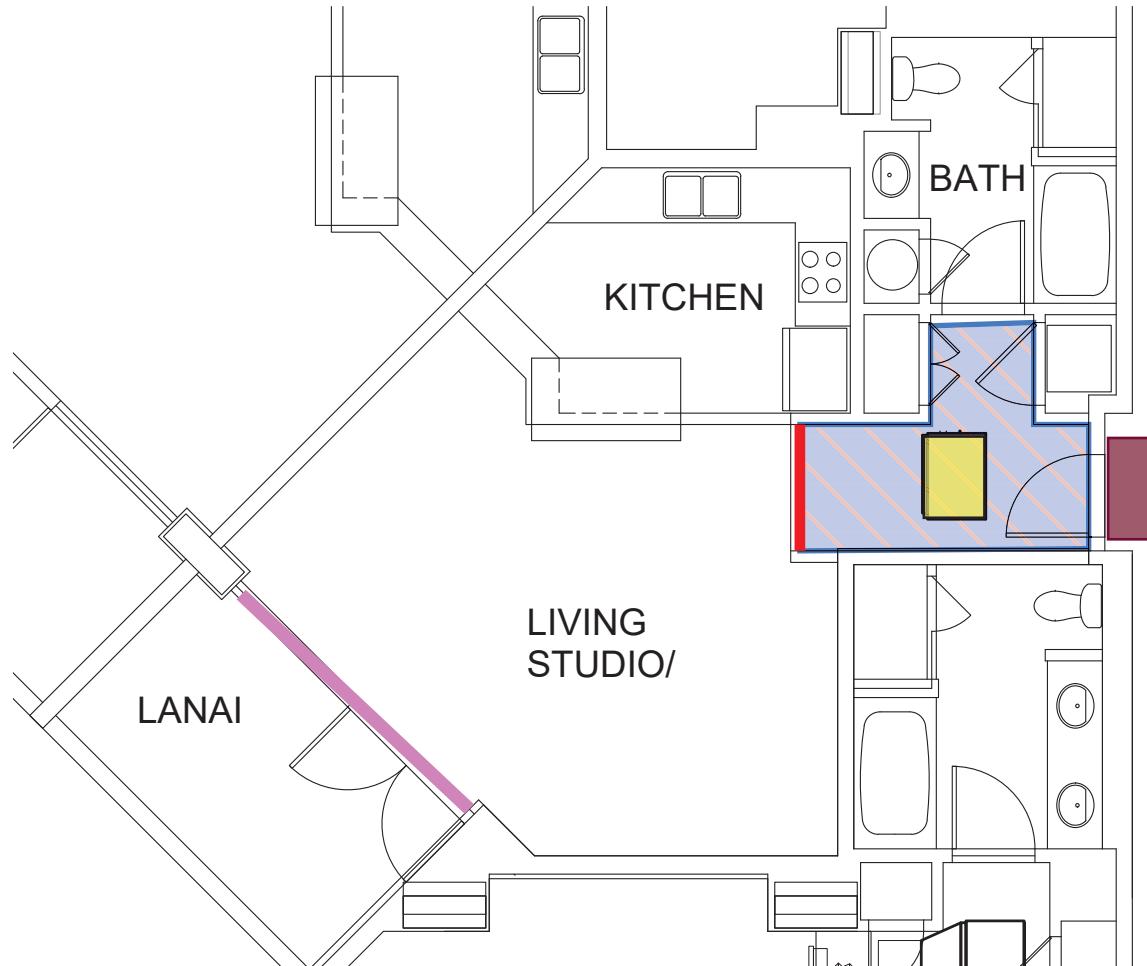

Floor Mat
Adhesive mat will be placed at entry to mitigate dust tracking to hallways

Doors and Windows
All exterior openings to remain closed for the duration of construction

Existing Fan Coil Unit Location
Diagram shows expected approximate location of the existing Fan Coil Unit. The units are not in the same location as the access panels and will require a larger opening to be cut. Existing access panels will be restored to existing locations where possible.

Note to Residents/Owners: The layout in this diagram represents the original design locations of the Fan Coil Unit in your apartment. We realize that some units may have FCUs located in slightly different positions than what is shown on this drawing. In such cases, the area under and near the actual, existing FCU will be the "Work Area" and the shortest pathway leading to the "Work Area" will be included in the "Path of Travel".

FLOOR PLAN - UNIT A1

Work Area - OVERHEAD EQUIPMENT WORK
Remove all furnishings and items on exposed counters and surfaces. Floor protection to be provided with plastic sheathing at openings.

Path of Travel
Remove all furnishings and wall art. Floor protection to be provided.

Plastic Sheathing
Floor to ceiling plastic sheathing to be provided. Sheathing will not have through access to mitigate dust.

Floor Mat
Adhesive mat will be placed at entry to mitigate dust tracking to hallways

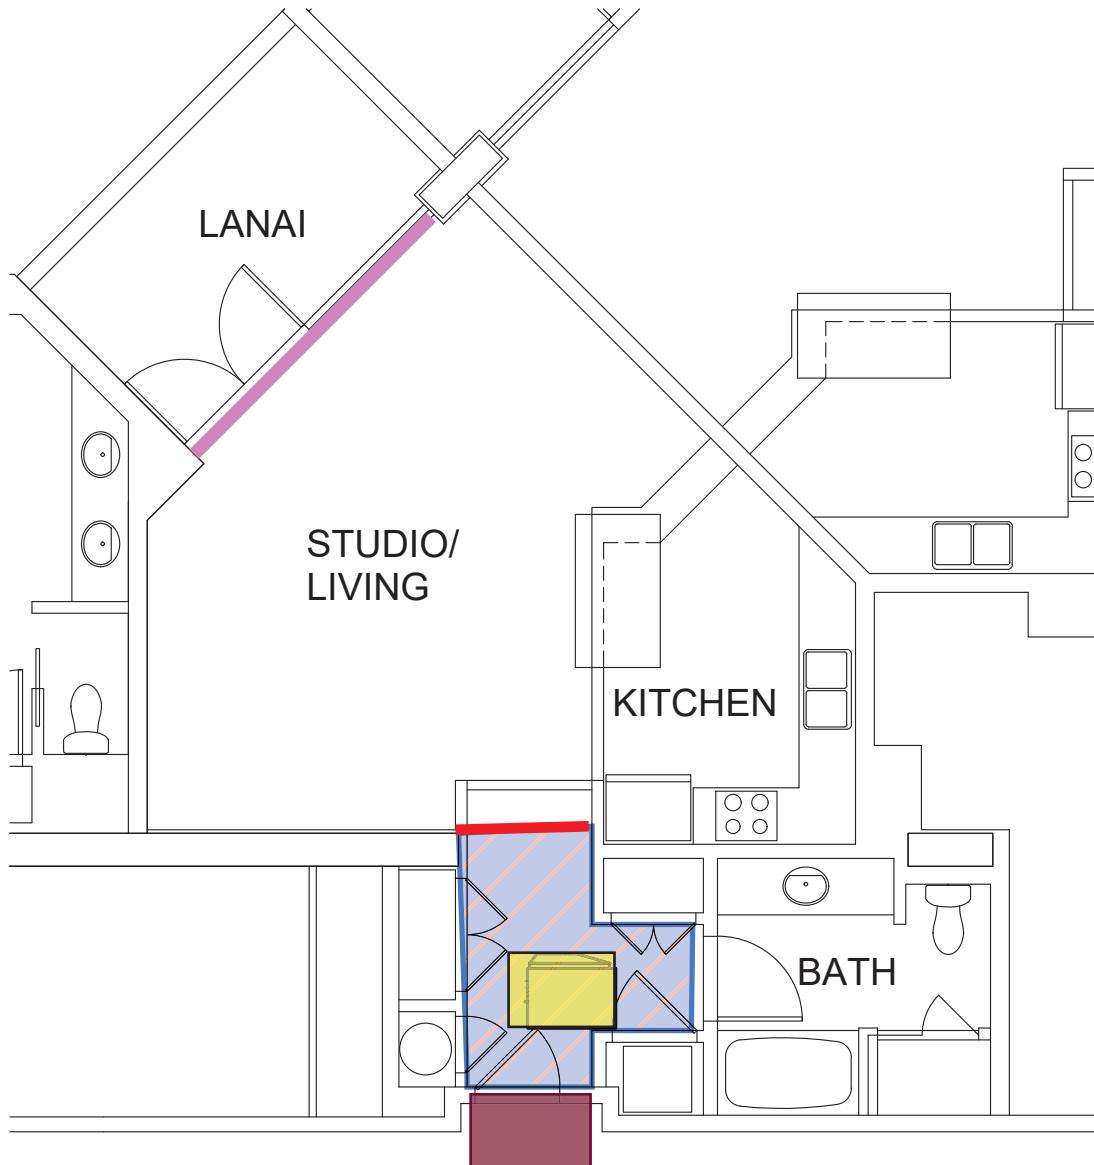

Doors and Windows
All exterior openings to remain closed for the duration of construction

Work Area - OVERHEAD EQUIPMENT WORK
Remove all furnishings and items on exposed counters and surfaces. Floor protection to be provided with plastic sheathing at openings.

Path of Travel
Remove all furnishings and wall art. Floor protection to be provided.

Plastic Sheathing
Floor to ceiling plastic sheathing to be provided. Sheathing will not have through access to mitigate dust.

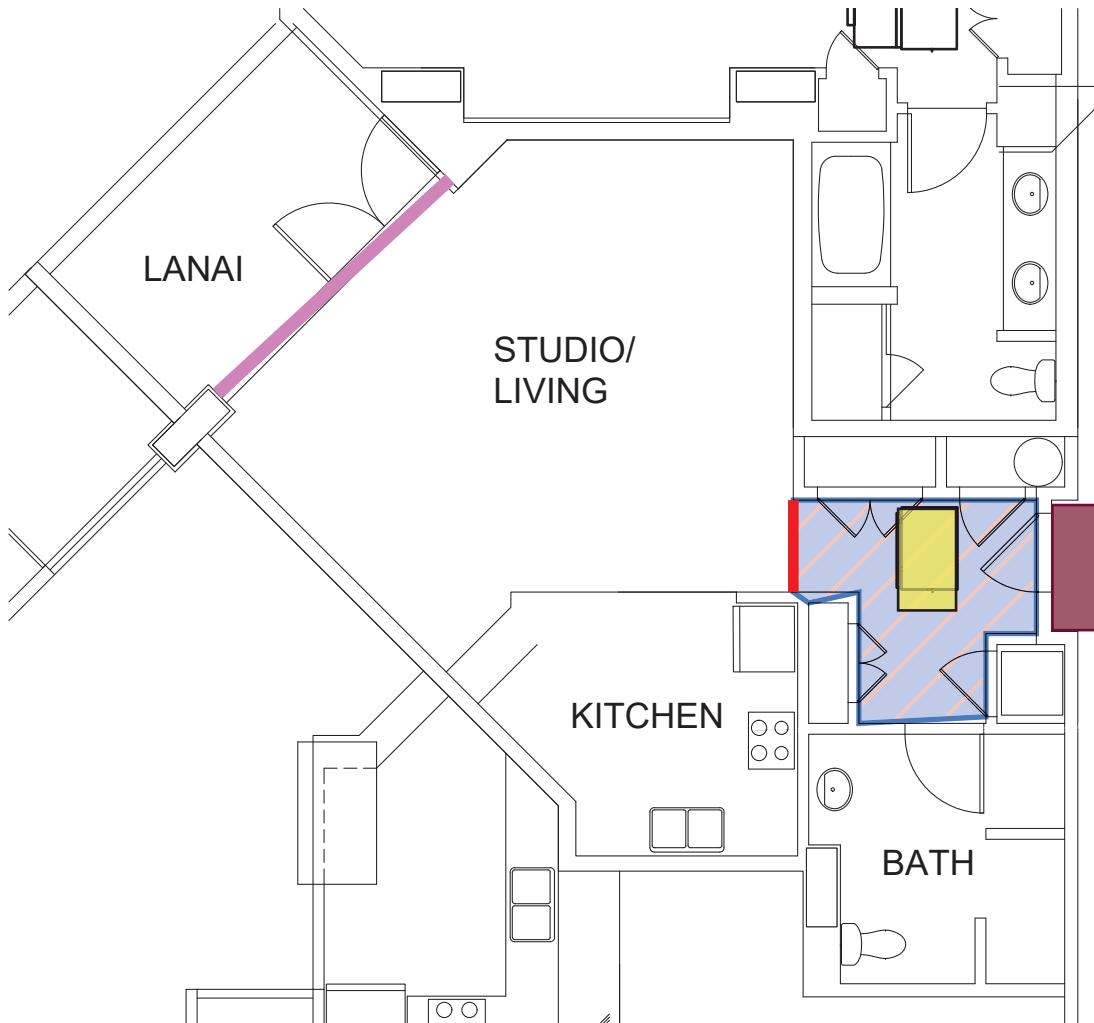

Floor Mat
Adhesive mat will be placed at entry to mitigate dust tracking to hallways

Doors and Windows
All exterior openings to remain closed for the duration of construction

Existing Fan Coil Unit Location
Diagram shows expected approximate location of the existing Fan Coil Unit. The units are not in the same location as the access panels and will require a larger opening to be cut. Existing access panels will be restored to existing locations where possible.

Note to Residents/Owners: The layout in this diagram represents the original design locations of the Fan Coil Unit in your apartment. We realize that some units may have FCUs located in slightly different positions than what is shown on this drawing. In such cases, the area under and near the actual, existing FCU will be the "Work Area" and the shortest pathway leading to the "Work Area" will be included in the "Path of Travel".

FLOOR PLAN - UNIT BD1A

Work Area - OVERHEAD EQUIPMENT WORK
Remove all furnishings and items on exposed counters and surfaces. Floor protection to be provided with plastic sheathing at openings.

Path of Travel
Remove all furnishings and wall art. Floor protection to be provided.

Plastic Sheathing
Floor to ceiling plastic sheathing to be provided. Sheathing will not have through access to mitigate dust.

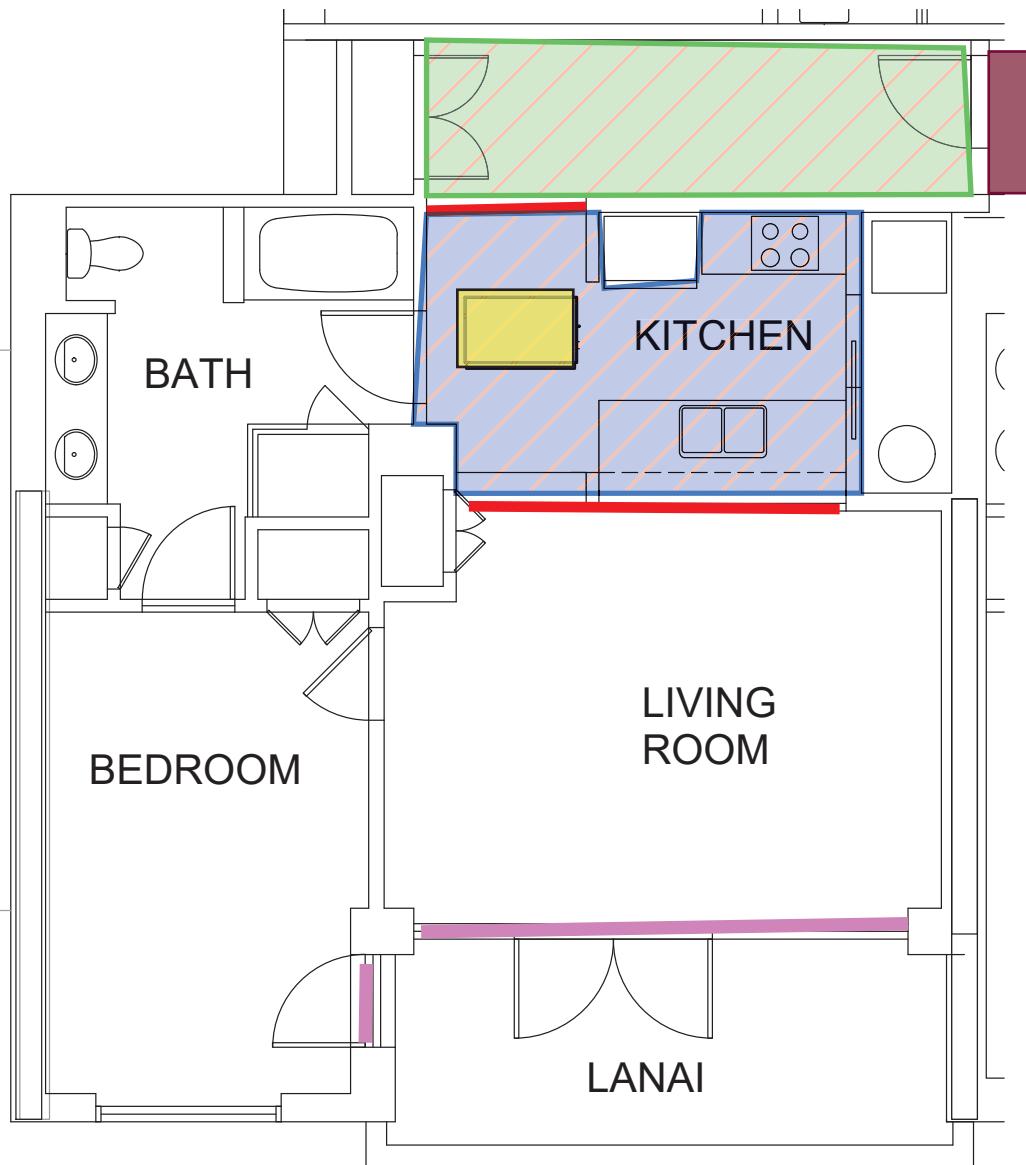

Floor Mat
Adhesive mat will be placed at entry to mitigate dust tracking to hallways

Doors and Windows
All exterior openings to remain closed for the duration of construction

Existing Fan Coil Unit Location

FLOOR PLAN - UNIT C9

Work Area - OVERHEAD EQUIPMENT WORK
Remove all furnishings and items on exposed counters and surfaces. Floor protection to be provided with plastic sheathing at openings.

Path of Travel
Remove all furnishings and wall art. Floor protection to be provided.

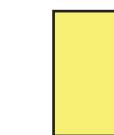

Plastic Sheathing
Floor to ceiling plastic sheathing to be provided. Sheathing will not have through access to mitigate dust.

Floor Mat
Adhesive mat will be placed at entry to mitigate dust tracking to hallways

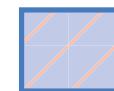

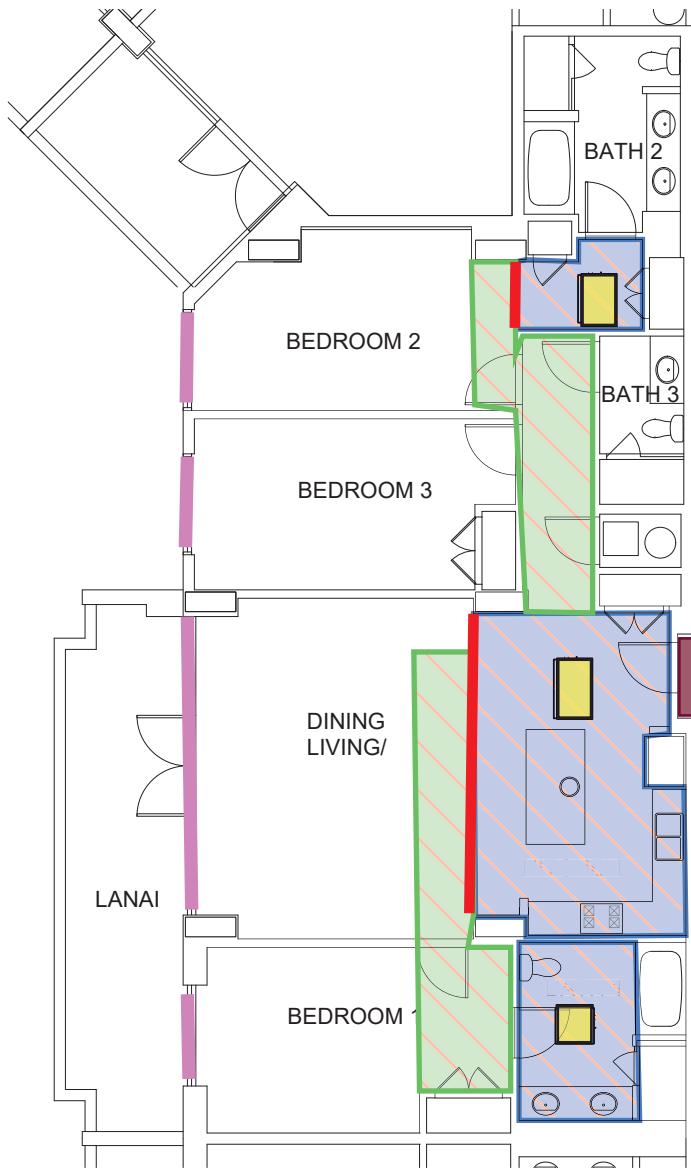

Doors and Windows
All exterior openings to remain closed for the duration of construction

Existing Fan Coil Unit Location
Diagram shows expected approximate location of the existing Fan Coil Unit. The units are not in the same location as the access panels and will require a larger opening to be cut. Existing access panels will be restored to existing locations where possible.

Note to Residents/Owners: The layout in this diagram represents the original design locations of the Fan Coil Unit in your apartment. We realize that some units may have FCUs located in slightly different positions than what is shown on this drawing. In such cases, the area under and near the actual, existing FCU will be the "Work Area" and the shortest pathway leading to the "Work Area" will be included in the "Path of Travel".

FLOOR PLAN - UNIT C10

Work Area - OVERHEAD EQUIPMENT WORK
Remove all furnishings and items on exposed counters and surfaces. Floor protection to be provided with plastic sheathing at openings.

Path of Travel
Remove all furnishings and wall art. Floor protection to be provided.

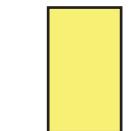

Plastic Sheathing
Floor to ceiling plastic sheathing to be provided. Sheathing will not have through access to mitigate dust.

Floor Mat
Adhesive mat will be placed at entry to mitigate dust tracking to hallways

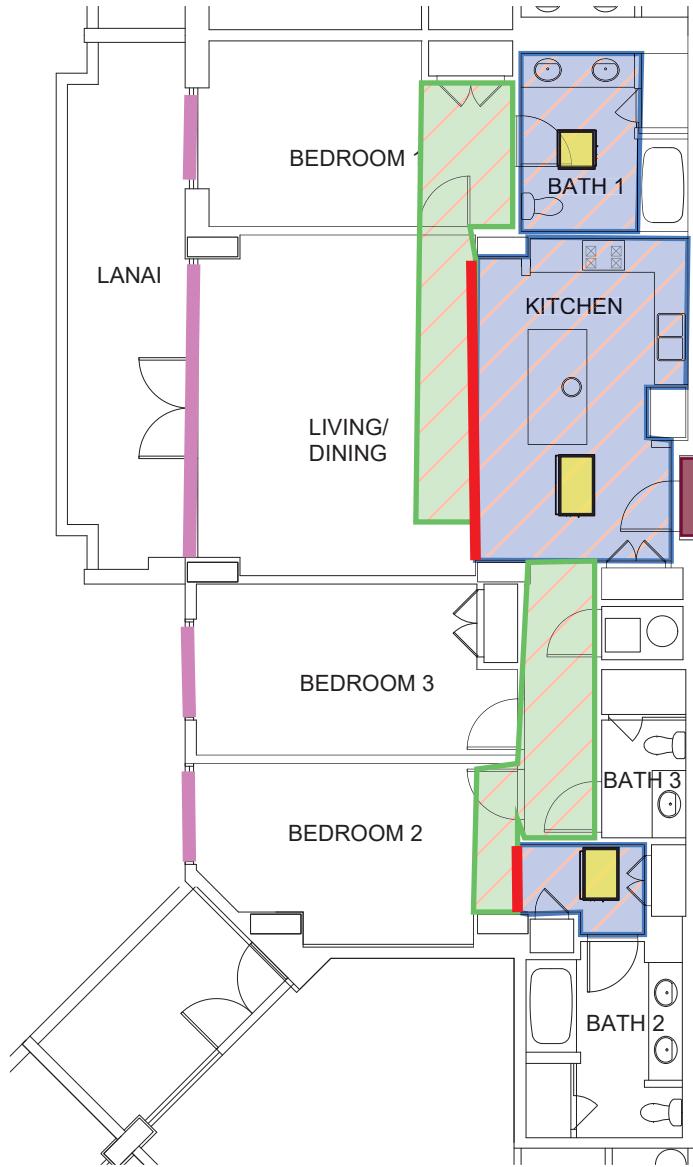

Doors and Windows
All exterior openings to remain closed for the duration of construction

Existing Fan Coil Unit Location
